

Inpatient Rehab Program

2018 Disclosure Statement

The Rehabilitation Program at Children’s Hospital New Orleans provided rehabilitation services to 75 patients last year. Services include Physical Therapy, Occupational Therapy, Speech Therapy, social work/case management, Recreation Therapy, Music Therapy, Rehabilitation Medicine and 24-hour rehabilitation nursing.

Children’s Hospital New Orleans Rehabilitation Program treats patients through 21 years of age. The patient must be medically stable and have exhibited a decline in functional status that requires comprehensive treatment along with training and education of the patient and caregiver and ability to tolerate 3 hours of therapy per day. The Rehabilitation program is part of the larger hospital, so all the support services and medical services are available to provide your child the safest and highest quality of care. We are the only CARF Accredited Inpatient Rehab Pediatric Specialty program in the Gulf South.

Our commitment to you

It is the mission of the Inpatient Rehabilitation program to provide excellence in rehabilitative care through an interdisciplinary, comprehensive and compassionate approach to the patient and family to maximize functional wellbeing and enhance quality of life.

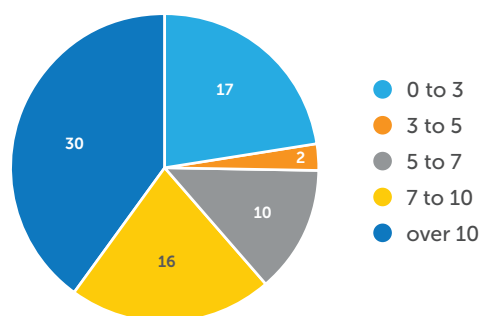

- Our patients are our first concern. We provide them with quality services in a caring environment.
- Every child is entitled to increase their functionality to the highest level possible through training and education.
- Every family/caregiver is entitled to education and training to competently care for their child as needed.
- We provide competent and innovative management of the patient’s rehabilitation needs through training and on-going education of the staff.
- We always operate with attention to individual, cultural, and community standards of legal, ethical, and moral practice.

Accreditations

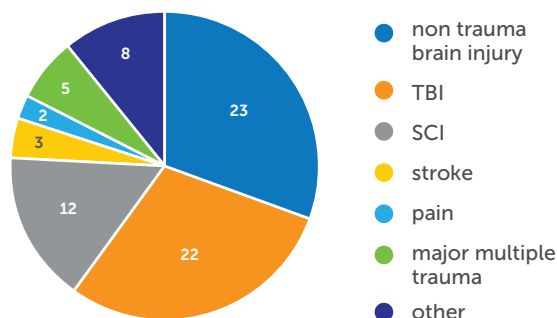

- The Joint Commission
- Commission of Accreditation of Rehabilitation Facilities (CARF)
