

# How to Add Patient Photos

- 1) When in a video, the patient will need to tap their self-view picture-in-picture.

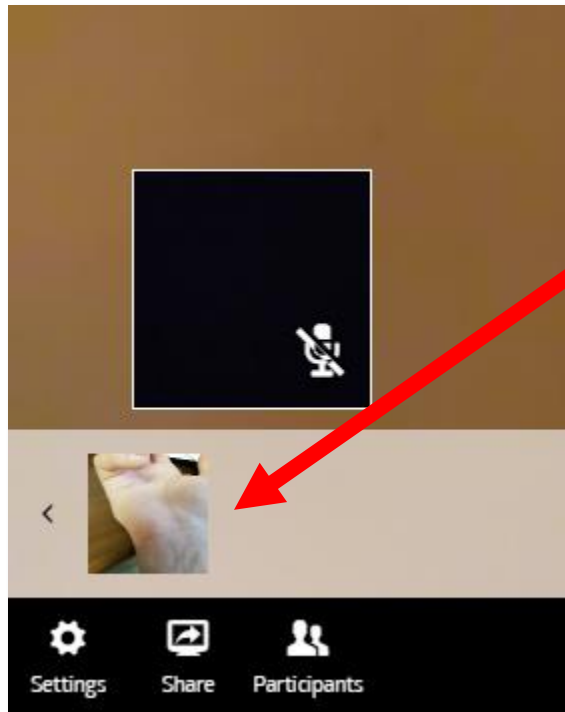

- 2) The Patient Will Tap **View Self Fullscreen**

- 3) The Patient Can Capture the Image on Their Phone by Tapping **Snapshot**. They also have the option to switch the camera if that gives a better image quality.

- 4) On the Provider's View, the Screenshot Will Appear in the **Images Bar**.

- 5) Click on the Thumbnail to Expand.

**Note: All Images Captured in this Way are Permanently Saved.**
